### **Online Computer-Based Training for Security Awareness**

A security awareness training program required for all state employees has been converted from a classroom setting to a computer-based format, saving \$136,000 in initial licensing fees, \$60,000 in annual renewal licensing fees and \$900,000 worth of employee time. It is adaptable for implementation by other agencies. ### **Security Training**

Trak-IT, a user-friendly learning management system developed by Department of Health staff in Tallahassee, provides online access to security training opportunities. Reduced man-hours to collect data, reduced need for conference rooms and equipment coordination, and increased ability to respond to training needs saved \$66,665 the first year.
